Subject: RE: Publicly Available Info Rainbow Montessori
Attachments: Triple Site Indoor Air 4-16.pdf

Hi Lilian,

The following is an example e-mail that you can revise. I had a question about what other health agency this person can be referred to regarding their health questions or if there are any screenings available. Let me know what you think.
Thanks, Cynthia

Dear [Name],

Thank you for reaching out to EPA with your concerns. The indoor air investigation at Rainbow Montessori School has been ongoing and under EPA's direction since August 2014. Previously, the site was under the oversight responsibility of the State of California, Regional Water Quality Control Board of San Francisco. In June 2017, we completed the successful installation of mitigation systems underneath all five school buildings on campus. These systems are a permanent solution to prevent TCE vapors from groundwater contaminated by historic releases from rising and accumulating indoors.

If you have any questions regarding your child's potential exposure during 2004-2005, you may access publicly available reports that are stored on a website called GeoTracker. These reports were historically uploaded by the Water Board.

Here is the link to the website and some brief instructions:

https://geotracker.waterboards.ca.gov/profile_report?global_id=T10000005145

- Select the tab Site Maps / Documents
- Scroll to the bottom and you'll find Monitoring Reports including indoor air evaluations in 2004-2005

EPA does not provide advice regarding health screenings or tests as a result from potential indoor air exposures. [Is there another agency that they can be referred to?]

Please refer to the attached Triple Site Fact Sheet for more information about the vapor intrusion investigation.

Please do not hesitate to contact me at (415) 972-3010 or by e-mail to abreu.lilian@epa.gov if you have any questions.

Sincerely,

EXTERNAL SENDER

Hi Cynthia,

Could you please work with Rose and provide a very short summary of the work that has been performed at the rainbow Montessori Child Development Center and current status, and provide links to publicly available information on EPA and State websites.

Let me know if you have any questions.
